

NANOTISE™ FOGGING

THE BEST PROTECTION FOR YOUR STAFF & CUSTOMERS

COVID-19 has caused significant disruption, forcing businesses to implement time-consuming, laborious and often expensive protocols to try and prevent transmission. Another challenge is giving employees, customers and patients the confidence to return to your premises or your venue and re-engage face-to-face with colleagues and customers, without fear of infection.

MOST DISINFECTANTS DO ONLY HALF THE JOB

They kill what's on the surface at the time but, after they've evaporated, they offer no protection against what's to come. No matter how frequent your sanitising cycle is, it's impossible to keep up with recontamination, leaving employees, customers and visitors vulnerable for extended periods of time.

SO, DON'T JUST SANITISE - NANOTISE™

Our innovative Nanotise™ antimicrobial fogging treatment uses nanotechnology to offer next level protection against 99.9% of germs, viruses (including COVID-19) and bacteria for up to 30 days after application. With applications done after hours, there's no disruption to your day-to-day operations.

 ANTIMICROBIAL TREATMENT THAT LASTS 30 DAYS	 KILLS 99.9% OF GERMS, VIRUSES & BACTERIA
 ALCOHOL FREE FORMULATION	 SAFE AROUND CHILDREN, PETS & PLANTS
 NON TOXIC & ECO FRIENDLY	 DISINFECTS & CLEANS ALL HARD & SOFT SURFACES
 3RD PARTY TESTED WITH PROVEN RESULTS	 PROTECTS THE COMMUNITY FROM INFECTION

SUITED TO MANY ENVIRONMENTS

- ✓ Business Office
- ✓ Child Care
- ✓ Gyms
- ✓ Hospitality
- ✓ Aged Care
- ✓ Retail

HOW NANOTISE!™ FOGGING WORKS

Specially designed foggers dispense a fine antimicrobial mist that deposits a fine layer of protection on all hard and soft surfaces, immediately destroying bacteria on contact.

Once this layer dries it bonds to the surface, forming an invisible protective barrier of positively charged molecules that kill the negatively charged pathogens (germs and viruses) that come into contact with it.

The **Nanotise™** barrier continues to defend against bacteria, preventing contact transmission for up to 30 days, giving employees, customers and visitors peace of mind that they are being protected 24/7.

THE NO GERMS DIFFERENCE.

No Germs is an Australian, family-owned business with over 15 years experience in infection control and sanitation.

We're Australia's leader in **Nanotise™** fogging applications that are proven to deliver superior, long-lasting protection against infection.

We use Australian-made, hospital grade TGA-registered disinfectant in our fogging treatments.

Our commitment to protecting your staff, customers, and visitors is unparalleled – our reputation depends on it. That's why we personally oversee all applications to ensure they're done right.

We offer cost-effective packages for monthly **Nanotise™** fogging treatments, Prevention is better than cure, so call us now to set an appointment for your free quote.

WHAT OUR CLIENTS SAY...

"Since using No Germs' Nanotise fogging, we've seen significant reductions in days lost to sick leave. The ATP swab results give us confidence in the efficacy of the treatment, and their hand sanitiser solution has not only saved us money, but is much preferred by our staff. I'd recommend No Germs to anyone running a business that is looking to give staff the confidence to return to the office."

Marie Montignie,
Office Manager Unispace

"We have used No Germs Nanotise fogging treatment with great success over the past year and have recently renewed our contract with them. The proven effectiveness of their treatment, as well as their professionalism and commitment have earned the trust of our management, staff and parents."

Marianne Zaki, Director
Rise & Shine Kindergarten
